

Danville Area Community College
Associate in Science and Arts Degree
Graduation Requirements

Revised January 2008
 Effective Fall 2007

This is designed to facilitate the student in planning a program which will meet requirements at DACC. Although it is the responsibility of the student to know and to observe the requirements of his/her curriculum, it is strongly recommended that the student meet with a counselor/advisor in planning a course of study. A well planned program should concurrently meet DACC degree requirements as well as successfully transfer to fulfill curriculum requirements at a Senior Institution.

The student's total program must contain a minimum of sixty (60) semester hours of academic work with a cumulative grade point average of not less than 3.0. Candidates for the Associate in Science and Arts Degree or the Associate in Engineering Science Degree must present an organized program of study which meets the following General Education requirements:

*A non-western class is recommended from either the humanities or social science categories. Courses in ***bold/italic type*** meet the Human Relations content requirement.
