

Fire Science

Career Programs at Danville Area Community College

The DACC Fire Science curriculum was designed to give students academic background and initial training for careers in fire fighting. A firefighter may be expected to perform many duties including: fighting fires, maintaining fire equipment and educating the public about fire prevention. Additional skills or duties might include: rendering first aid, helping to preserve a possible crime scene, testifying in court and instructing other firefighters. A genuine sense of duty to one's community is essential for someone to excel in the firefighting career.

Program Specific Courses:

- Techniques of Fire Fighting (Module A)
- Techniques of Fire Fighting (Module B)
- Techniques of Fire Fighting (Module C)
- EMT Basic
- Tactics and Strategy I
- Technical Rescue Awareness
- Fire Prevention Principles/Fire Service Laws and Regulations
- Fire Science Practicum
- Hazardous Materials Operations
- Fire Management I
- Fire Management II
- Fire Instructor I
- Fire Apparatus Engineer
- Vehicle and Machinery Operations

Upon completion of the program, a DACC Associate in Applied Science degree will be granted. If a student meets eligibility requirements and successfully passes the Illinois State Fire Marshal's final exam. Firefighter II and Fire Officer I certification will be granted. Students who wish to pursue this program should be on a volunteer fire department. This program is an occupational program typically not designed to transfer, however, this program has been articulated to some senior institutions. Please contact a counselor for specific details.
