

Medical Laboratory Technician

Career Program at Danville Area Community College

The medical laboratory technician performs general tests in all laboratory areas - Blood banking, Chemistry, Hematology, Immunology and Microbiology. Working with the supervision of a medical technologist, a medical laboratory technician hunts for clues to the absence, presence, extent, and causes of diseases. This career is particularly appealing to science-oriented individuals who want to participate in health care.

This is a shared cooperative program with Kankakee Community College (KCC) which provides both the classroom and clinical experience necessary for a graduate to pursue a career in the clinical laboratory science field. General education and prerequisite courses can be completed at DACC. Major specific courses offered by Kankakee Community College can be completed on-line. Labs associated with on-line courses can be completed at KCC by attending on-campus labs approximately eight times a semester during the 2nd and 3rd semesters of the program. Lab and clinical experiences can also be arranged at Provena United Samaritans Hospital in Danville.

Job/Employment Information:

Where Can You Find a Job? Most medical laboratory technicians (MLTs) work in hospitals and physician's clinics. Veterinary labs, industrial, pharmaceutical, environmental, and research laboratories also employ MLTs.

Expected Salary Range: Medical laboratory technicians with an Associate degree can expect to earn between \$24,558-\$45,439. For the most current salary information visit www.ilworkinfo.com.
